M. RAHUL

AI/ML GRADUATE | SOFTWARE DEVELOPER

+91 99664 89012 | rahul2rcf@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

AI/ML graduate and software developer with project experience building document intelligence, retrieval-augmented question answering, resume-to-role analysis, and responsive web applications. Familiar with Python, Java, React, TypeScript, REST APIs, SQL, and retrieval techniques including BM25 and optional vector search. Interested in developing reliable, user-focused AI and full-stack products with traceable evidence and privacy-aware workflows.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript (ES6), TypeScript, SQL
AI / Document Intelligence: NLP fundamentals, document Q&A, hybrid retrieval, BM25, embeddings and vector search (FAISS/Sentence Transformers), evidence-grounded answers, evaluation metrics
Backend / APIs: FastAPI, REST APIs, Spring Boot, JDBC, JSP/Servlets
Frontend: React, HTML5, CSS3, Tailwind CSS, responsive UI
Databases / Tools: SQLite, MySQL, Git, GitHub, Vite, Streamlit, PyMuPDF
Core CS: Object-Oriented Programming (OOP), DBMS, Computer Networks

SELECTED PROJECTS

EvidenceDesk | Local-First Document Question Answering | GitHub

Tech: Python, FastAPI, React, TypeScript, PyMuPDF, SQLite, BM25, FAISS, Sentence Transformers

- Built a local-first PDF/TXT question-answering application with page-aware extraction, chunking, hybrid keyword/vector retrieval, and source citations.
- Implemented document validation, SHA-256 duplicate detection, SQLite-backed document and answer metadata, source previews, query history, and feedback capture.
- Added evidence-threshold abstention and a reproducible evaluation workflow; the repository reports Recall@5 1.00 and MRR 0.975 on 50 synthetic questions. Results are experimental and not human-reviewed.

CareerLens AI | Evidence-Linked Resume-to-Role Analysis | GitHub

Tech: Python, Streamlit, TF-IDF, skill matching, Groq API (optional), HTML/CSS/JavaScript demo

- Developed a resume review workflow that compares resume text with a target job description and separates matched skills, missing terms, and required/preferred requirements.
- Surfaces supporting resume snippets for detected skills and generates role-specific improvement guidance, with downloadable reports and reviewed draft exports.
- Included an interactive synthetic-data demo and optional AI-assisted rewriting; documented that the score is a heuristic estimate, not a real ATS score or hiring prediction.

ResourceNest | Learning and Career Resource Hub | GitHub

Tech: HTML5, CSS3, JavaScript

- Built and deployed a searchable resource hub for learners and job seekers with category filters, learning roadmaps, browser-saved progress, and career-preparation checklists.
- Published the project as a static site and organized content around developer documentation, learning paths, and job preparation.

EXPERIENCE

Full Stack Developer Intern | Palle Technology | Jan 2026 - Jun 2026

- Worked on full-stack application development using Java, Spring Boot, Hibernate, MySQL, React, and REST APIs.
- Developed backend modules and authentication flows with Spring Boot, and built responsive React components for user-facing workflows.

EDUCATION

B.Tech | Sir C V Raman Institute of Science and Technology | Oct 2022 - Jun 2026

Computer Science and Engineering | CGPA: 7.92 | Andhra Pradesh, India

Intermediate (MPC) | Sir CV Raman Junior College | Dec 2020 - Apr 2022

Score: 8.2 | Andhra Pradesh, India

SSC | Z P High School, Chukkaluru | Jul 2020

10th CGPA: 9.2 | Andhra Pradesh, India

ACHIEVEMENTS & COMMUNITY

- Solved 500 difficulty-rated problems on CodeChef.
- Selected for the Software Development Intern role under the Campus to Corporate (C2C) Internship Program at Palle Technology (2026).
- Contributed to open-source initiatives including GSSoC and Hacktoberfest.
